Version 3.0

Score: 800/1000

Version:

Time Limit: 120 Minutes

Exam A (120 questions)

Question 1

What three elements make up the Service Portfolio?

- ☐ Customer portfolio, service catalogue and retired services
- ☐ Customer portfolio, configuration management system and service catalogue
- ☐ Service pipeline, service catalogue and retired services
- ☐ Service pipeline, configuration management system and service catalogue

Question 2

Which is a supplier category?

- ☐ Technical
- ☐ Commodity
- ☐ Customer
- ☐ Resource

Question 3

What is defined as any component that needs to be managed in order to deliver an IT service?

- ☐ A service request
- ☐ A configuration item (CI)
- ☐ An incident
- ☐ An IT asset

Question 4

Which service level metrics are BEST for measuring user experience?

- ☐ Single system-based metrics
- ☐ Metrics for the percentage of uptime of a service
- ☐ Operational metrics
- ☐ Metrics linked to defined outcomes

Question 5

What type of change is pre-authorized, low risk, relatively common, and follows a procedure or work instruction?

- ☐ A standard change
- ☐ An emergency change
- ☐ An internal change
- ☐ A normal change

Question 6

When should a change request be submitted to resolve a problem?

- ☐ As soon as a solution for the problem has been identified
- ☐ As soon as a workaround for the problem has been identified
- ☐ As soon as the analysis of the frequency and impact of incidents justifies the change
- ☐ As soon as the analysis of cost, risks and benefits justifies the change

Question 7

What should a release policy include?

- ☐ The process owner and process manager for each type of release
- ☐ The roles and responsibilities for incident and problem resolution
- ☐ The naming convention and expected frequency of each type of release
- ☐ The naming convention for all configuration items (CI) recorded in the configuration management system (CMS)

Question 8

Which statement about IT service management is CORRECT?

- ☐ It is performed by customers using a mix of IT systems, services and processes
- ☐ It is performed by IT service providers using a mix of suppliers and their products
- ☐ It is performed by the service desk using a mix of people, process and technology
- ☐ It is performed by IT service providers using a mix of people, process and technology

Question 9

Which guiding principle recommends coordinating all dimensions of service management?

- ☐ Start where you are
- ☐ Progress iteratively with feedback
- ☐ Think and work holistically
- ☐ Keep it simple and practical

Question 10

Which term is used to describe the prediction and control of income and expenditure within an organization?

- ☐ Charging
- ☐ Governance
- ☐ Budgeting
- ☐ Accounting

Question 11

Which skill is an essential part of the 'service level management' practice?

- ☐ Technical knowledge
- ☐ Listening
- ☐ Diagnosis
- ☐ Problem analysis

Question 12

What is defined as a cause, or potential cause, of one or more incidents?

- ☐ Change
- ☐ Event
- ☐ Known error
- ☐ Problem

Question 13

What is the purpose of the 'relationship management' practice?

- ☐ To establish and nurture the links between the organization and its stakeholders
- ☐ To align the organization's practices and services with changing business needs
- ☐ To set clear business-based targets for service performance
- ☐ To support the agreed quality of a service handling all agreed, user-initiated service requests

Question 14

Service transition contains detailed descriptions of which processes?

- ☐ Change management, service asset and configuration management, release and deployment management
- ☐ Change management, capacity management, event management, service request management
- ☐ Service level management, service portfolio management, service asset and configuration management
- ☐ Service asset and configuration management, release and deployment management, request fulfillment

Question 15

How should the workflow for a new service request be designed?

- ☐ Use a single workflow for all types of service request
- ☐ Use different workflows for each type of service request
- ☐ Avoid workflows for simple service requests
- ☐ Leverage existing workflows whenever possible

Question 16

Which problem management activity ensures that a problem can be easily tracked and management information can be obtained?

- ☐ Categorization
- ☐ Detection
- ☐ Prioritization
- ☐ Escalation

Question 17

A major incident has been closed, but there is a risk that it might happen again. How should this be logged and managed?

- ☐ As a change request
- ☐ As a service request
- ☐ As an event
- ☐ As a problem

Question 18

What is an IT asset?

- ☐ Any financially valuable component that can contribute to delivery of an IT product or service
- ☐ Any component that needs to be managed in order to deliver a service
- ☐ A request from a user that initiates a service action
- ☐ The removal of anything that could have a direct or indirect effect on services

Question 19

Which is the correct combination of items that makes up an IT service?

- ☐ Customers, providers and documents
- ☐ Information technology, people and processes
- ☐ Information technology, networks and people
- ☐ People, processes and customers

Question 20

Which practice has a purpose that includes aligning the organization's practices and services with changing business needs?

- ☐ Service level management
- ☐ Service configuration management
- ☐ Relationship management
- ☐ Continual improvement

Question 21

Which statement about costs is CORRECT?

- ☐ Costs imposed on the consumer are costs of service utility
- ☐ Costs removed from the consumer are part of the value proposition
- ☐ Costs imposed on the consumer are costs of service warranty
- ☐ Costs removed from the consumer are part of service consumption

Question 22

Which function is responsible for the management of a data centre?

- ☐ Technical management
- ☐ Service desk
- ☐ Application management
- ☐ Facilities management

Question 23

When should the effectiveness of a problem workaround be assessed?

- ☐ Whenever the workaround is used
- ☐ Whenever the problem is resolved
- ☐ Whenever the workaround becomes a known error
- ☐ Whenever the problem is prioritized

Question 24

What is NOT within the scope of service catalogue management?

- ☐ Contribution to the definition of services
- ☐ Interfaces between all services and supporting services
- ☐ Interfaces between the service catalogue and service portfolio
- ☐ Fulfilment of business service requests

Question 25

What can be used to help determine the impact level of a problem?

- ☐ Definitive media library (DML)
- ☐ Configuration management system (CMS)
- ☐ Statement of requirements (SOR)
- ☐ Standard operating procedures (SOP)

Question 26

Which two statements about the 'service request management' practice are CORRECT?

1. Service requests are part of normal service delivery
2. Complaints can be handled as service requests
3. Service requests result from a failure in service
4. Normal changes should be handled as service requests

- ☐ 1 and 2
- ☐ 2 and 3
- ☐ 3 and 4
- ☐ 1 and 4

Question 27

Which practice coordinates the classification, ownership and communication of service requests and incidents?

- ☐ Supplier management
- ☐ Service desk
- ☐ Problem management
- ☐ Relationship management

Question 28

Which statement about metrics is CORRECT?

- ☐ Process metrics can be used to measure end-to-end service performance
- ☐ Technology metrics can be used to measure component performance and availability
- ☐ Process metrics can be used to measure the utilization of a supplier's network
- ☐ Technology metrics can be used to determine the overall health of a process

Question 29

Which guiding principle helps to ensure that better information is available for decision making?

- ☐ Keep it simple and practical
- ☐ Think and work holistically
- ☐ Optimize and automate
- ☐ Collaborate and promote visibility

Question 30

What defines the requirements for a service and takes responsibility for the outcomes of service consumption?

- ☐ An IT asset
- ☐ A customer
- ☐ A configuration item (CI)
- ☐ A user

Question 31

Which is an important principle of communication in service operation?

- ☐ Information should always be communicated
- ☐ It has an intended purpose or a resultant action
- ☐ Meetings are always the best method of communication
- ☐ It is stored in the configuration management system

Question 32

Which stage of the service lifecycle has the purpose of looking for ways to improve process efficiency and cost effectiveness?

- ☐ Service operation
- ☐ Service transition
- ☐ Continual service improvement
- ☐ Service strategy

Question 33

What is a means of enabling value co-creation by facilitating outcomes that customers want to achieve, without the customer having to manage specific costs and risks?

- ☐ Service management
- ☐ Continual improvement
- ☐ A service
- ☐ An IT asset

Question 34

Which is a key requirement for a successful service level agreement?

- ☐ It should be written in legal language
- ☐ It should be simply written and easy to understand
- ☐ It should be based on the service provider's view of the service
- ☐ It should relate to simple operational metrics

Question 35

What should be used to set user expectations for request fulfillment times?

- ☐ The time that the customer indicates for service delivery
- ☐ The consumer demand for the service
- ☐ The time needed to realistically deliver the service
- ☐ The service levels of the supplier

Question 36

What is described by the service value system?

- ☐ How all the components and activities of the organization work together as a system to enable value creation
- ☐ Services based on one or more products, designed to address needs of a target consumer group
- ☐ Joint activities performed by a service provider and a service consumer to ensure continual value co-creation
- ☐ How to apply the systems approach of the guiding principle think and work holistically

Question 37

Which statement about the steps to fulfill a service request is CORRECT?

- ☐ They should be complex and detailed
- ☐ They should be well-known and proven
- ☐ They should include incident handling
- ☐ They should be brief and simple

Question 38

Which describes normal changes?

- ☐ Changes that are low-risk and pre-authorized
- ☐ Changes that need to be scheduled and assessed following a process
- ☐ Changes that are typically initiated as service requests
- ☐ Changes that must be implemented as soon as possible

Question 39

Which ITIL guiding principle recommends using existing services, processes and tools when improving services?

- ☐ Progress iteratively with feedback
- ☐ Keep it simple and practical
- ☐ Start where you are
- ☐ Focus on value

Question 40

Where should all master copies of controlled software and documentation be stored?

- ☐ In the definitive capacity library
- ☐ In the definitive media library
- ☐ In the definitive security library
- ☐ In the definitive production library

Question 41

How does information about problems and known errors contribute to 'incident management'?

- ☐ It enables quick and efficient diagnosis of incidents
- ☐ It removes the need for regular customer updates
- ☐ It removes the need for collaboration during incident resolution
- ☐ It enables the reassessment of known errors

Question 42

Which statement about change management is CORRECT?

- ☐ It optimizes overall business risk
- ☐ It optimizes financial exposure
- ☐ It ensures that all changes are authorized by the change advisory board (CAB)
- ☐ It ensures that service requests follow the normal change management process

Question 43

Which is an objective of the design coordination process?

- ☐ To produce service design packages and ensure they are handed over to service transition
- ☐ To assess and evaluate all changes and their impact on service designs
- ☐ To document the initial structure and relationship between services and customers
- ☐ To gather and document new service level requirements from the customer

Question 44

Which are the elements of process control?

- ☐ Inputs, outputs and triggers
- ☐ Work instructions, procedures and roles
- ☐ Resources, capabilities and metrics
- ☐ Process owner, policy and objectives

Question 45

Which process is used to compare the value that new services offer with the value of the services they have replaced?

- ☐ Availability management
- ☐ Capacity management
- ☐ Service portfolio management
- ☐ Service catalogue management

Question 46

In which two situations should the ITIL guiding principles be considered?

1. In every initiative
2. In relationships with all stakeholders
3. Only in specific initiatives where the principle is relevant
4. Only in specific stakeholder relationships where the principle is relevant

- ☐ 1 and 2
- ☐ 2 and 3
- ☐ 3 and 4
- ☐ 1 and 4

Question 47

Which is the CORRECT explanation of the 'R' role in a RACI matrix?

- ☐ This role ensures that activities are executed correctly
- ☐ This role has ownership of the end result
- ☐ This role is involved in providing knowledge and input
- ☐ This role ensures the flow of information to stakeholders

Question 48

Which is NOT a structure of service desk that is described in the ITIL service operation guidance?

- ☐ Local
- ☐ Centralized
- ☐ Outsourced
- ☐ Virtual

Question 49

Which is part of service provision?

- ☐ The management of resources configured to deliver the service
- ☐ The management of resources needed to consume the service
- ☐ The grouping of one or more services based on one or more products
- ☐ The joint activities performed to ensure continual value co-creation

Question 50

Which processes are responsible for the regular review of underpinning contracts?

- ☐ Supplier management and service level management
- ☐ Supplier management and change management
- ☐ Availability management and service level management
- ☐ Supplier management and availability management

Question 51

Which is an example of improving service utility using service management automation?

- ☐ Pre-determined routing of a service request
- ☐ Reducing the time to compile service data
- ☐ Monitoring service availability
- ☐ Faster resource allocation

Question 52

What do customer perceptions and business outcomes help to define?

- ☐ The value of a service
- ☐ Service metrics
- ☐ The total cost of a service
- ☐ Key performance indicators (KPIs)

Question 53

Which dimension includes a workflow management system?

- ☐ Organizations and people
- ☐ Partners and suppliers
- ☐ Information and technology
- ☐ Value streams and processes

Question 54

Which stakeholders co-create value in a service relationship?

- ☐ Investor and supplier
- ☐ Consumer and provider
- ☐ Provider and supplier
- ☐ Investor and consumer

Question 55

What is the expected outcome from using a service value chain?

- ☐ Service value streams
- ☐ Customer engagement
- ☐ Value realization
- ☐ The application of practices

Question 56

Which of these should be logged and managed as a problem?

- ☐ A user requests delivery of a laptop
- ☐ A monitoring tool detects a change of state for a service
- ☐ Trend analysis shows a large number of similar incidents
- ☐ 'Continual improvement' needs to prioritize an improvement opportunity

Question 57

What is the CORRECT definition of service management?

- ☐ A set of specialized assets for transitioning services into the live operational environment
- ☐ A set of specialized organizational capabilities for delivering value to customers in the form of services
- ☐ The capability of supplier to deliver services to providers in exchange for money
- ☐ The capability of service providers to minimize their costs without reducing the value of the services

Question 58

Which service transition process provides guidance about converting data into information?

- ☐ Change evaluation
- ☐ Knowledge management
- ☐ Service validation and testing
- ☐ Service asset and configuration management

Question 59

What is typically needed to assign complex incidents to support groups?

- ☐ A self-help tool
- ☐ The incident priority
- ☐ A change schedule
- ☐ The incident category

Question 60

Which statement about the known error database (KEDB) is CORRECT?

- ☐ It is maintained by the service desk and updated with the details of each new incident
- ☐ It is a part of the configuration management database (CMDB) and contains workarounds
- ☐ It is maintained by problem management and is used by the service desk to help resolve incidents
- ☐ It is maintained by incident management and contains solutions to be implemented by problem management

Question 61

What helps diagnose and resolve a simple incident?

- ☐ Rapid escalation
- ☐ Formation of a temporary team
- ☐ The use of scripts
- ☐ Problem prioritization

Question 62

Which two statements about an organization's culture are CORRECT?

It is created from shared values based on how it carries out its work
It is determined by the type of technology used to support services
It should be based on the culture of prospective suppliers
It should be based on the objectives of the organization

- ☐ 1 and 2
- ☐ 2 and 3
- ☐ 3 and 4
- ☐ 1 and 4

Question 63

What is the primary focus of business capacity management?

- ☐ Management, control and prediction of the performance, utilization and capacity of individual elements of IT technology
- ☐ Review of all capacity supplier agreements and underpinning contracts with supplier management
- ☐ Management, control and prediction of the end-to-end performance and capacity of the live, operational IT services
- ☐ Future business requirements for IT services are quantified, designed, planned and implemented in a timely fashion

Question 64

What takes place in the “Did we get there?” step of the continual service improvement (CSI) approach?

- ☐ An initial baseline assessment
- ☐ The production of a detailed CSI plan
- ☐ Verifying that improvement targets have been achieved
- ☐ Understanding priorities for improvement

Question 65

What are the three phases of 'problem management'?

- ☐ Problem logging, problem classification, problem resolution
- ☐ Incident management, problem management, change control
- ☐ Problem identification, problem control, error control
- ☐ Problem analysis, error identification, incident resolution

Question 66

Which guiding principle recommends standardizing and streamlining manual tasks?

- ☐ Optimize and automate
- ☐ Collaborate and promote visibility
- ☐ Focus on value
- ☐ Think and work holistically

Question 67

Which practice has a purpose that includes ensuring that risks have been properly assessed?

- ☐ Service configuration management
- ☐ Problem management
- ☐ Service level management
- ☐ Change control

Question 68

Which dimension considers how knowledge assets should be protected?

- ☐ Organizations and people
- ☐ Partners and suppliers
- ☐ Information and technology
- ☐ Value streams and processes

Question 69

Which statement about the 'four Ps' of service design is CORRECT?

- ☐ Processes refers to skill and training
- ☐ Partners refers to suppliers and vendors
- ☐ People refers to technology and tools
- ☐ Products refers to producers and metrics

Question 70

Which statement about outcomes is CORRECT?

- ☐ An outcome can be enabled by more than one output
- ☐ Outcomes are how the service performs
- ☐ An output can be enabled by one or more outcomes
- ☐ An outcome is a tangible or intangible activity

Question 71

Who is responsible for defining metrics for change management?

- ☐ The change management process owner
- ☐ The change advisory board (CAB)
- ☐ The service owner
- ☐ The continual service improvement manager

Question 72

How does a service consumer contribute to the reduction of risk?

- ☐ By paying for the service
- ☐ By managing server hardware
- ☐ By communicating constraints
- ☐ By managing staff availability

Question 73

When planning 'continual improvement', which approach for assessing the current state of a service is CORRECT?

- ☐ An organization should always use a single technique to ensure metrics are consistent
- ☐ An organization should always use a strength, weakness, opportunity and threat (SWOT) analysis
- ☐ An organization should always develop competencies in methodologies and techniques that will meet their needs
- ☐ An organization should always use an approach that combines Lean, Agile and DevOps methodologies

Question 74

What MAIN factors are considered to assess the priority of an incident?

- ☐ The urgency and impact
- ☐ The impact and complexity
- ☐ The cost and urgency
- ☐ The complexity and cost

Question 75

Which guiding principle recommends using the minimum number of steps necessary to achieve an objective?

- ☐ Progress iteratively with feedback
- ☐ Focus on value
- ☐ Think and work holistically
- ☐ Keep it simple and practical

Question 76

Which statement BEST describes the value of service strategy to the business?

- ☐ It allows higher volumes of successful change
- ☐ It reduces unplanned costs through optimized handling of service outages
- ☐ It reduces the duration and frequency of service outages
- ☐ It enables the service provider to understand what levels of service will make their customers successful

Question 77

Which process works with incident management to ensure that security breaches are detected and logged?

- ☐ Change management
- ☐ Service level management
- ☐ Access management
- ☐ Continual service improvement

Question 78

Identify the missing word in the following sentence.

The purpose of the service configuration management practice is to ensure that accurate and reliable information about the configuration of services, and the [?] that support them, is available when and where it is needed.

- ☐ suppliers
- ☐ CIs
- ☐ customers
- ☐ assets

Question 79

Which are phases of the release and deployment process?

1. Release build and test
2. Review and close
3. Categorize and record
4. Change authorization and schedule

- ☐ 1 and 2
- ☐ 1 and 3
- ☐ 2 and 4
- ☐ 3 and 4

Question 80

Which statement about emergency changes is CORRECT?

- ☐ The testing of emergency can be eliminated in order to implement the change quickly
- ☐ The assessment and authorization of emergency changes is expedited to ensure they can be implemented quickly
- ☐ Emergency changes should be authorized and implemented as service requests
- ☐ Emergency changes must be fully documented before authorization and implementation

Question 81

Which dimension includes activities and workflows?

- ☐ Organizations and people
- ☐ Information and technology
- ☐ Partners and suppliers
- ☐ Value streams and processes

Question 82

Which describes a standard change?

- ☐ A change that needs to be scheduled, assessed and authorized following a defined process
- ☐ A change that is typically implemented as a service request
- ☐ A high-risk change that needs very thorough assessment
- ☐ A change that must be implemented as soon as possible

Question 83

What are the MOST important skills required by service desk staff?

- ☐ Incident analysis skills
- ☐ Technical skills
- ☐ Problem resolution skills
- ☐ Supplier management skills

Question 84

What is the purpose of the 'information security management' practice?

- ☐ To protect the information needed by the organization to conduct its business
- ☐ To observe services and service components
- ☐ To ensure that accurate and reliable information about the configuration of services is available when and where it is needed
- ☐ To plan and manage the full lifecycle of all IT assets

Question 85

How should automation be implemented?

- ☐ By replacing human intervention wherever possible
- ☐ By replacing the existing tools first
- ☐ By initially concentrating on the most complex tasks
- ☐ By optimizing as much as possible first

Question 86

Which ITIL practice has a purpose that includes reducing the likelihood of incidents?

- ☐ Change control
- ☐ Continual improvement
- ☐ Problem management
- ☐ Service desk

Question 87

Which is the CORRECT approach for managing a large improvement initiative as smaller iterations?

- ☐ Each iteration should be designed before starting the initiative and implemented without feedback
- ☐ Feedback should only be taken into account when one iteration fails to meet its objective
- ☐ Feedback should be reduced for large improvements as it is unlikely that circumstances will change
- ☐ Each iteration should be continually re-evaluated based on feedback

Question 88

Identify the missing word in the following sentence.

The purpose of the supplier management practice is to ensure that the organization's suppliers and their [?] are managed appropriately to support the seamless provision of quality products and services.

- ☐ costs
- ☐ users
- ☐ value
- ☐ performances

Question 89

Which statement about outcomes is CORRECT?

- ☐ Outcomes are one or more services that fulfill the needs of a service consumer
- ☐ Service providers help service consumers achieve outcomes
- ☐ Outcomes help service consumers achieve outputs
- ☐ Helping service consumers achieve outcomes reduces service provider costs

Question 90

Which is NOT a component of the service value system?

- ☐ The guiding principles
- ☐ Governance
- ☐ Practices
- ☐ The four dimensions of service management

Question 91

What is warranty?

- ☐ Assurance that a product or service will meet agreed requirements
- ☐ The amount of money spent on a specific activity or resource
- ☐ The functionality offered by a product or service to meet a particular need
- ☐ The perceived benefits, usefulness and importance of something

Question 92

Which activity is part of the 'continual improvement' practice?

- ☐ Identifying and logging opportunities
- ☐ Delivering tactical and operational engagement with customers
- ☐ Populating and maintaining the asset register
- ☐ Providing a clear path for users to report issues, queries, and requests

Question 93

Identify the missing word in the following sentence.

A service is a means of enabling value co-creation by facilitating outcomes that customers want to achieve, without the customer having to manage specific [?] and risks.

- ☐ information
- ☐ costs
- ☐ utility
- ☐ warranty

Question 94

Identify the missing words in the following sentence.

The management of information security incidents usually requires [?].

- ☐ Immediate escalation
- ☐ Specialist teams
- ☐ A separate process
- ☐ Third party support

Question 95

Which practice updates information relating to symptoms and business impact?

- ☐ Service level management
- ☐ Change control
- ☐ Service request management
- ☐ Incident management

Question 96

Which describes a set of defined steps for implementing improvements?

- ☐ The 'improve' value chain activity
- ☐ The 'continual improvement register'
- ☐ The 'continual improvement model'
- ☐ The 'engage' value chain activity

Question 97

Which statement about a 'continual improvement register' is CORRECT?

- ☐ It should be managed at the senior level of the organization
- ☐ It should be used to capture user demand
- ☐ There should only be one for the whole organization
- ☐ It should be re-prioritized as ideas are documented

Question 98

What are the ITIL guiding principles used for?

- ☐ To help an organization make good decisions
- ☐ To direct and control an organization
- ☐ To identify activities that an organization must perform in order to deliver a valuable service
- ☐ To ensure that an organization's performance continually meets stakeholders' expectations

Question 99

Which competencies are required by the 'service level management' practice?

- ☐ Problem investigation and resolution
- ☐ Business analysis and commercial management
- ☐ Incident analysis and prioritization
- ☐ Balanced scorecard reviews and maturity assessment

Question 100

Which is a purpose of the 'engage' value chain activity?

- ☐ Meeting expectations for quality, costs and time-to-market
- ☐ Providing transparency and good relationships
- ☐ Ensuring the continual improvement of services
- ☐ Ensuring that the organization's vision is understood

Question 101

What is a definition of a service improvement plan (SIP)?

- ☐ A formal plan to implement improvements to a customer's business processes
- ☐ An input from availability management to service level management, detailing the service design plan
- ☐ A formal plan to implement improvements to a service or process
- ☐ An input from financial management for IT services to service level management, detailing the budget plan

Question 102

Which practice uses techniques such as SWOT analysis, balanced scorecard reviews, and maturity assessments?

- ☐ Incident management
- ☐ Problem management
- ☐ Continual improvement
- ☐ Service request management

Question 103

Which is one of the five aspects of service design?

- ☐ Management information systems and tools
- ☐ Risk analysis and management approach
- ☐ Management policy for business case creation
- ☐ Corporate governance and policy

Question 104

What should be done to determine the appropriate metrics for measuring a new service?

- ☐ Measuring the performance over the first six months, and basing a solution on the results
- ☐ Asking customers to provide numerical targets that meet their needs
- ☐ Asking customers open questions to establish their requirements
- ☐ Using operational data to provide detailed service reports

Question 105

What is a recommendation of the 'focus on value' guiding principle?

- ☐ Make 'focus on value' a responsibility of the management
- ☐ Focus on the value of new and significant projects first
- ☐ Focus on value for the service provider first
- ☐ Focus on value at every step of the improvement

Question 106

Identify the missing word in the following sentence.

The use of [?] should support, not replace what is observed, when using the 'start where you are' guiding principle.

- ☐ measurement
- ☐ tools
- ☐ plans
- ☐ process

Question 107

What are 'engage', 'plan' and 'improve' examples of?

- ☐ Service value chain activities
- ☐ Service level management
- ☐ Service value chain inputs
- ☐ Change control

Question 108

Which practice has a purpose to support the quality of the service by handling all agreed user initiated service requests?

- ☐ Change control
- ☐ IT asset management
- ☐ Service desk
- ☐ Service request management

Question 109

Which practice has a purpose that includes observing a service to report selected changes of state identified as events?

- ☐ Information security management
- ☐ Monitoring and event management
- ☐ Incident management
- ☐ Change control

Question 110

Which guiding principle recommends eliminating activities that do not contribute to the creation of value?

- ☐ Start where you are
- ☐ Collaborate and promote visibility
- ☐ Keep it simple and practical
- ☐ Optimize and automate

Question 111

Which statement about service desks is CORRECT?

- ☐ The service desk should work in close collaboration with support and development teams
- ☐ The service desk should rely on self-service portals instead of escalation to support teams
- ☐ The service desk should remain isolated from technical support teams
- ☐ The service desk should escalate all technical issues to support and development teams

Question 112

Which is included in the purpose of the 'design and transition' value chain activity?

- ☐ Ensuring that service components are available when needed
- ☐ Providing transparency and good stakeholder relationships
- ☐ Supporting services according to specifications
- ☐ Continually meeting stakeholder expectations for costs

Question 113

When should a full risk assessment and authorization be carried out for a standard change?

- ☐ Each time the standard change is implemented
- ☐ When the procedure for the standard change is created
- ☐ At least once a year
- ☐ When an emergency change is requested

Question 114

Which practice owns and manages issues, queries and requests from users?

- ☐ Incident management
- ☐ Service desk
- ☐ Change control
- ☐ Problem management

Question 115

Which of the following should IT service continuity strategy be based on?

1. Design of the service metrics
2. Business continuity strategy
3. Business impact analysis (BIA)
4. Risk assessment

- ☐ 1, 2 and 4 only
- ☐ 1, 2 and 3 only
- ☐ 2, 3 and 4 only
- ☐ 1, 3 and 4 only

Question 116

Identify the missing word in the following sentence.

A change is defined as the addition, modification, or removal of anything that could have a direct or indirect effect on [?].

- ☐ assets
- ☐ values
- ☐ elements
- ☐ services

Question 117

Which practice requires that staff demonstrate excellent customer service skills, such as empathy and emotional intelligence?

- ☐ Problem management
- ☐ Supplier management
- ☐ Release management
- ☐ Service desk

Question 118

Which service catalogue view is considered beneficial when constructing the relationship between services, SLAs, OLAs, and other underpinning agreements?

- ☐ Service-based SLA view
- ☐ Wholesale customer view
- ☐ Retail customer view
- ☐ Supporting services view

Question 119

What is the purpose of the 'deployment management' practice?

- ☐ To ensure services achieve agreed and expected performance
- ☐ To make new or changed services available for use
- ☐ To move new or changed components to live environments
- ☐ To set clear business-based targets for service performance

Question 120

Which is a service request?

- ☐ Requesting a workaround for an issue
- ☐ Requesting information about how to create a document
- ☐ Requesting an enhancement to an application
- ☐ Requesting investigation of a degraded service
