Topic 1, Configure and Manage SharePoint On-Premises

Case Study (4 questions)

Overview

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.
Existing Environment
Active Directory
The network contains an Active Directory forest named litwareinc.com. The forest contains a single domain. All domain controllers run Windows Server 2016.

SharePoint Server Environment
Litware has a SharePoint Server 2019 farm that contains the servers shown in the following table.

Name	Configuration
SPWEB1	Front-end server
SPWEB2	Front-end server
SPCACHE1	Distributed cache server
SPAPP1	Application server
SPSEARCH1	Search server
SPSEARCH2	Search server
SQLSVR1	Microsoft SQL Server
SQLSVR2	Microsoft SQL Server

Central Administration has a URL of http://spweb1.litwareinc.com.

Licensed to Berend Post berend.post@it-university.nl

The HR department currently uses a SharePoint web application that uses only forms authentication.

The sales department has a SharePoint site that is available anonymously to display product information.

Line-of-Business Application
You have a line-of-business application named LOBApp. LOBApp stores content in a SQL Server database named LOBAppDB.

LOBApp has a service account named LobAppSA.

Problem Statements
Litware identifies the following issues:

None of the SharePoint sites use TLS.
The Distributed Cache Problem service uses the farm account.
When users perform searches from the SharePoint site of the HR department, they receive no results.
You discover that the user names and passwords configured for managed services were transmitted on the network in plain text.
Requirements
Business Goals
All the components in the SharePoint Server farm must be highly available by using the least number of servers possible.

Each document stored in the HR department site must have the following pieces of metadata: CONID, CONNO, CONDate, and CONApproved.

Security
The farm uses the managed service accounts shown in the following table.

Account name	Description
Spfarm	Farm account
SpContent	SharePoint content database account
SpServices	SharePoint service account
SpSecureStore	SharePoint Secure Store Service account
SpBI	SharePoint Business Intelligence
LOBAppSA	Content access account for LOBApp

Technical Requirements
Litware identifies the following technical requirements:

LOBApp content must be visible in search results.
The principle of least privilege must be used whenever possible.
All SharePoint service applications must use the SpServices account.
Information for each product must be displayed as a separate webpage for the sales department.
Search crawling must start every 10 minutes, regardless of whether the prior session is complete.

Licensed to Berend Post berend.post@it-university.nl

The Cloud Search Service Application must crawl on-premises content in a cloud hybrid search solution.
The Secure Store Service application must use LitwareAppID as the target application to access LOBAppDB.

Question 1

You need to resolve the issues related to passwords being transmitted over the network.

What should you do?

- ☒ Configure the SQL servers to use TLS.
- ☐ Configure Central Administration to use forms authentication.
- ☐ On SPWEB1, configure a firewall rule that allows outbound traffic on TCP port 443.
- ☐ Configure Central Administration to use Secure Sockets Layer (SSL).

Question 2

You need to recommend changes to the existing environment to support the minimum high-availability SharePoint Server farm. The solution must minimize costs.

Which three changes should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- ☒ Change the role of SPWEB1 and SPWEB2 to Front-end with Distributed Cache.
- ☒ Change the role of SPSEARCH1 and SPSEARCH2 to Application with Search.
- ☒ Remove SPCACHE1 and SPAPP1 from the farm.
- ☐ Change the role of SPCACHE1 to Single-Server Farm.
- ☐ Change the role of SPAPP1 to Single-Server Farm.
- ☐ Remove1 SPWEB1 and SPSEARCH1 from the farm.

Question 3

You need to implement the business goals for the HR department.

What should you do?

- ☐ Create a content type that contains site columns. Add the content type to the document libraries.
- ☐ Add site columns to a document library. Save the document library as a template.
- ☒ Enable enterprise metadata and keywords for the document libraries.
- ☐ Activate Content Type Syndication Hub. Update the Column default value settings for the document library.

Licensed to Berend Post berend.post@it-university.nl

Question 4

Which feature should you activate for the sales department?

- ☐ SharePoint Server Standard Site Collection features
- ☐ Site Policy feature
- ☐ SharePoint Server Enterprise Site Collection features
- ☒ SharePoint Server Publishing Infrastructure

(20 questions)

Question 5

You have a SharePoint Server farm that contains a term store.

The root site collection users a URL of https://contoso.com/.

You need to find all the terms used by the root site collection.

Which URL should you use?

- ☐ https://contoso.com/_layouts/15/termstoremanager.aspx
- ☐ https://contoso.com/_layouts/15/contenttypesyndicationhubs.aspx
- ☐ https://contoso.com/_layouts/15/auditsettings.aspx
- ☒ https://contoso.com/lists/taxonomyhiddenlist/allitems.aspx

Question 6

You have a SharePoint Server farm.

You need to ensure that a group named Group1 can create and edit term set hierarchies in a term set group named TermGroup1. The solution must use the principle of least privilege.

What is the best role to assign to Group1 to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- ☐ Term Store Administrators
- ☐ Stakeholders for TermGroup1
- ☐ Owner for TermGroup1
- ☐ Group Managers for TermGroup1
- ☒ Contributors for TermGroup1

Licensed to Berend Post berend.post@it-university.nl

Question 7

You have a SharePoint Server farm.

You need to ensure that a user named User1 can apply style sheets and override list behaviors. The solution must use the principle of least privilege.

Which permission best achieves the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- ☐ Edit
- ☐ Full Control
- ☒ Design
- ☐ Limited Access

Question 8

You have a SharePoint Server farm that has one web application. The web application contains one site collection. The site collection contains one site.

You need to enable managed navigation.

What should you do?

- ☐ From Site Features, activate SharePoint Server Enterprise Site features.
- ☐ From Site Collection Features, activate SharePoint Server Enterprise Site Collection features.
- ☒ From Site Features, activate SharePoint Server Publishing.
- ☐ From Site Collection Features, activate SharePoint Server Publishing Infrastructure.

Explanation:

References:

https://support.office.com/en-us/article/enable-managed-navigation-for-a-site-in-sharepoint-49a067dc-77d2-455d-9e77-250ec7cc0a6d

Licensed to Berend Post berend.post@it-university.nl

Question 9

You have a SharePoint Server farm.

You need to add enterprise keywords to the term store.

To which term group should you add the keywords?

- ☐ Search Dictionaries
- ☒ System
- ☐ People
- ☐ Library

Question 10

You have a SharePoint Server farm and a Microsoft Exchange Server organization. SharePoint Server crawls Exchange Server content.

You create a new result source that uses the Exchange Server protocol.

You need to ensure that users can search the Exchange Server content.

What should you create?

- ☐ a custom search result type
- ☐ an additional index partition
- ☐ a Search Center
- ☒ an eDiscovery Center

Explanation:

References:

https://docs.microsoft.com/en-us/sharepoint/search/configure-result-sources-for-search

Licensed to Berend Post berend.post@it-university.nl

Question 11

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than once correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a SharePoint Server farm.

A user attempts to create a site column named RequestType that uses a managed metadata term set named RequestTypes as metadata. The user reports that Allow 'Fill-in' choices are set to No, and the option cannot be configured.

You need to ensure that the user can set Allow 'Fill-in' choices to Yes.

Solution: You add the user as a term set stakeholder.

Does this meet the goal?

- ☐ Yes
- ☒ No

Licensed to Berend Post berend.post@it-university.nl

Question 12

Your company has a SharePoint Server farm.

Each department at the company has an associated Active Directory group.

You plan to deploy a Business Connectivity Services (BCS) solution for all the users in the human resources (HR) department. BCS will connect to a Microsoft SQL Server named SQL1. SQL1 uses SQL Server Authentication.

You need to ensure that BCS can access SQL1. Authentication credentials and connection information must be encrypted.

What should you do?

- ☐ Create a target application that uses a Target Application Type of Group Ticket.
- ☐ Add a new field named ConnectionString and set the field type to PIN.
- ☐ Set the credentials for the target application.
- ☒ Create a target application that uses a Target Application Type of Group.
- ☒ Add a new field named ConnectionString and set the field type to Generic.
- ☒ Set the credentials for the target application.
- ☐ Create a target application that uses a Target Application Type of Individual Ticket.
- ☐ Add a new field named ConnectionString and set the field type to Key.
- ☐ Set the credentials for the target application.
- ☐ Create a target application that uses a Target Application Type of Individual.
- ☐ Add a new field named ConnectionString and set the field type to PIN.
- ☐ Set the credentials for the target application.

Question 13

You have a SharePoint Server farm.

You plan to use a Managed Metadata Service application.

You need to disable folksonomy.

Which option should you disable from the Managed Metadata Service Connection properties?

- ☐ This service application is the default storage location for column specific term sets.
- ☐ Push-down Content Type Publishing updates from the Content Type Gallery to sub-sites and lists using the content type.
- ☐ Consumes content types from the Content Type Gallery.
- ☒ This service application is the default storage location for Keywords.

Explanation:

Reference:

https://docs.microsoft.com/en-us/sharepoint/governance/configure-the-managed-metadata-service

Licensed to Berend Post berend.post@it-university.nl

Question 14

You have a SharePoint Server farm.

The root site collection has a URL of http://sharepoint.contoso.com.

You install and configure Workflow Manager on a server that has an FQDN on workflow.contoso.com.

Workflow administrators report that they cannot create SharePoint 2013 workflows from SharePoint Designer in http://sharepoint.contoso.com.

You need to ensure that the workflow administrators can create SharePoint 2013 workflows.

Which command should you run?

- ☐ Set-SPWorkflowConfig –webapplication
- ☐ http://sharepoint.contoso.com DeclarativeWorkflowsEnabled $true
- ☐ New-SPWorkManagementServiceApplicationProxy –name
- ☐ 'Work Management Service Application Proxy' –ServiceApplication $sa
- ☐ New-SPWorkManagementServiceApplication –Name
- ☐ 'Work Management Service Application' –ApplicationPool
- ☐ 'SharePoint Web Services Default'
- ☒ Register-SPWorkflowService –SPSite http://sharepoint.contoso.com
- ☒ – Allow0AuthHttp –WorkflowHostUrl http://workflow.contoso.com:12291
- ☒ –ScopeName SharePoint - Force

Question 15

You have a SharePoint Server farm.

You configure the User Profile service.

You add a new attribute mapping for users.

The users report they cannot see the new attribute in their profile.

You need to ensure that the new attribute is displayed for all users as quickly as possible.

What should you run?

- ☒ a full profile synchronization
- ☐ a full crawl
- ☐ an incremental profile synchronization
- ☐ an incremental crawl

Explanation:

References:

Licensed to Berend Post berend.post@it-university.nl

https://docs.microsoft.com/en-us/sharepoint/administration/start-profile-synchronization-manually

Question 16

You have a SharePoint Server farm.

You have several document libraries that contain AutoCAD files.

You discover that search results never return any of the AutoCAD files.

You need to crawl the AutoCAD files.

Which cmdlet should you run?

- ☐ Set-SPEnterpriseSearchFileFormatState
- ☒ New-SPEnterpriseSearchfileFormat
- ☐ Set-EnterpriseSearchResultItemType
- ☐ Add-FASTSearchResource

Question 17

You have a SharePoint Server farm.

You are troubleshooting Kerberos authentication for the farm.

You need to view the Kerberos tickets issued to the server.

What should you run?

- ☒ the klist.exe command
- ☐ the stsadm.exe command
- ☐ the Get-SPAuthenticationRealm cmdlet
- ☐ the Get-SPAppAcquisitionConfiguration cmdlet

Licensed to Berend Post berend.post@it-university.nl

Question 18

Your company has a SharePoint Server farm. All servers are virtualized on a Hyper-V host. The company has a single data center.

You need to design a disaster recovery solution. The solution must meet the following requirements:

If the data center fails, SharePoint Server services must be recoverable within 24 hours.
Up to one hour of data can be lost.
Costs must be minimized during normal operations.

Which technology best meets the requirements? More than one answer choice may achieve the goal.

- ☐ Hyper-V synchronous replication
- ☐ the OneDrive sync client
- ☐ the SharePoint Migration Tool
- ☒ Azure Site Recovery

Question 19

You have a SharePoint Server farm.

You need to ensure that only errors from SharePoint Server are logged in Event Viewer.

What should you configure from the Diagnostic Logging settings?

- ☐ usage and health data
- ☒ Event Throttling
- ☐ Event Log Flood Protection
- ☐ Restrict Trace Log disk space usage

Explanation:

References:

https://docs.microsoft.com/en-us/sharepoint/administration/configure-diagnostic-logging

Question 20

HOTSPOT

Your company has a SharePoint Server farm.

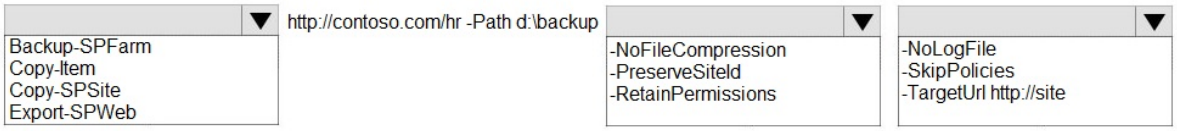

The human resources (HR) department at the company has a site that has a URL of http://contoso.com/hr.

You need to back up the HR department site every eight hours by using PowerShell. The backup must complete as quickly as possible.

How should you complete the command? To answer, select the appropriate options in the answer area.

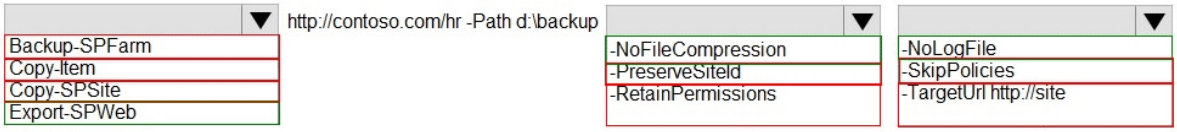

NOTE: Each correct selection is worth one point.

Answer Area

Solution:

Answer Area

Question 21

You have a SharePoint Server farm.

You have the following three types of document libraries: expense reports, purchase orders, and invoices. Each document in the libraries has an associated project code and cost center.

You need to ensure that when users check in expense reports, purchase orders, and invoices, the documents are associated to a project code and a cost center. The project code and cost center must be in a consistent format across all the document libraries. The solution must minimize administrative effort.

What should you include in the solution?

- ☒ managed properties
- ☐ site content types
- ☐ site columns
- ☐ site templates

Question 22

Your company has a SharePoint Server farm.

The company has a partner company that uses Microsoft 365.

You need to provide the users at the partner company with access to sites in the farm.

Which authentication method should you use?

- ☐ forms authentication
- ☐ Windows authentication
- ☒ SAML token-based authentication
- ☐ classic mode authentication
- ☐ claims-based authentication

Licensed to Berend Post berend.post@it-university.nl

Question 23

You have a SharePoint Server 2019 farm. The farm contains several Microsoft Office documents. All the documents have a property named Division that is populated automatically based on the document's author.

You create a text managed property that is retrievable and queryable, and you map the managed property to the Division property.

You need to find only the documents that have the Division property set to Legal.

For what should you search?

- ☒ Division=Legal
- ☐ "Legal"
- ☐ Division:Legal
- ☐ Legal ONLY

Question 24

You create a new color palette and font schemes.

You need to use the new palette and schemes to customize your SharePoint Server environment.

Where should you add the files you created?

- ☐ Style Library
- ☐ Managed Solutions Gallery
- ☒ Theme Gallery
- ☐ Master Page Gallery

Licensed to Berend Post berend.post@it-university.nl

Topic 2, Configure and Manage Hybrid Scenarios

(15 questions)

Question 25

You have a SharePoint Server 2019 farm and a SharePoint Online subscription.

You configure hybrid Microsoft OneDrive.

You need to ensure that hybrid users can follow documents in the farm by using Microsoft Delve.

What should you implement?

- ☐ hybrid business-to-business (B2B) sites
- ☐ hybrid taxonomy
- ☐ hybrid sites
- ☒ hybrid search

Question 26

You have a SharePoint Server farm and a SharePoint Online subscription.

You implement inbound hybrid search.

You need to ensure that SharePoint Online users can return search results from the farm.

What should you do?

- ☒ From SharePoint Online, create a Remote SharePoint result source.
- ☐ From on-premises SharePoint Server, create a Remote SharePoint result source.
- ☐ From SharePoint Online, create a query rule.
- ☐ From on-premises SharePoint Server, configure a Secure Store Service application.

Licensed to Berend Post berend.post@it-university.nl

Question 27

You have a SharePoint hybrid environment.

You have the following PowerShell script.

```
Import-Module MSOnline -force -verbose
Import-Module MSOnlineExtended -force -verbose

Connect-MsolService

$stscertpfx="c:\certs\sts_cert.pfx"
$stscertcer="c:\certs\sts_cert.cer"
$stscertpassword="*******"

$spoappid="00000003-0000-off1-ce00-0000000000"

$pfxCertificate=New-Object
System.Security.Cryptography.X509Certificates.X509Certificate2 $stscertpfx,
$stscertpassword, 20
Set-SPSecurityTokenServiceConfig -ImportSigningCertificate $pfxCertificate

iisreset
net stop SPTimerV4
net start SPTimerV4

$cerCertificate = New-Object
System.Security.Cryptography.X509Certificates.X509Certificate2
$cerCertificate.Import($stscertcer)
$cerCertificateBin = $cerCertificate.GetRawCertData()
$credValue = [System.Convert] : : ToBase64String($cerCertificateBin)

New-MsolServicePrincipalCredential -AppPrincipalId $spoappid -Type asymmetric -
Usage Verify -Value
$credValue
```

What is the effect of running the script?

- ☒ replaces an expired certificate for Microsoft Azure Active Directory (Azure AD) and on-premises SharePoint Server.
- ☐ replaces an expired certificate for Active Directory and SharePoint Online.
- ☐ configures SharePoint for hybrid search.
- ☐ configures on-premises SharePoint Server for federated authentication to Microsoft Azure Active Directory (Azure AD).

Licensed to Berend Post berend.post@it-university.nl

Question 28

You have a SharePoint Server farm and a Microsoft Office 365 subscription.

You implement hybrid search.

You discover that some search results are not hybrid search results. You discover that only the Domain Users security group is granted permissions to the content.

You need to resolve the issue.

What should you do?

- ☐ Configure all crawlers to use continuous crawls.
- ☐ Create a new user account. Grant the new user account permissions to the content. Modify the Default content access account to use the new user account.
- ☒ Add all users to a new domain group. Grant the new domain group permissions to the content. Perform a full crawl.
- ☐ Add all users as Search Service Application administrators. Perform a full crawl.

Explanation:

References:

https://docs.microsoft.com/en-us/sharepoint/hybrid/plan-cloud-hybrid-search-for-sharepoint#why-cant-users-get-hybrid-results-with-cloud-hybrid-search-when-theyre-members-of-the-domain-users-security-group

Question 29

You have a SharePoint Server farm and a Microsoft 365 subscription.

You plan to deploy the On-premises data gateway.

Which three cloud services can use the gateway to access SharePoint data? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- ☐ Microsoft StaffHub
- ☒ Microsoft PowerApps
- ☐ Microsoft Power BI
- ☒ Microsoft Planner
- ☒ Microsoft Flow

Licensed to Berend Post berend.post@it-university.nl

Question 30

You have a SharePoint Server farm and a Microsoft Office 365 tenant.

You plan to implement hybrid Microsoft OneDrive for Business for all users.

You need to ensure that the users can create a OneDrive for Business site in a hybrid configuration and use the social and collaboration features.

Which two user permissions should you assign to authenticated users? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- ☐ Manage Web Application User Policy for the My Site web application
- ☐ Manage Web Application Permission Policy for the My Site web application
- ☒ Follow People and Edit Profile for the User Profile service application
- ☒ Create Personal Site for the User Profile service application

Explanation:

Reference:

https://docs.microsoft.com/en-us/sharepoint/hybrid/configure-hybrid-onedrive-for-business#configure-user-permissions

Question 31

You have a SharePoint Server farm and a Microsoft 365 subscription.

You deploy the On-premises data gateway to your SharePoint Server on-premises environment.

You need to configure Microsoft PowerApps to use the gateway.

What should you add to PowerApps?

- ☒ a connection
- ☐ a picklist
- ☐ an entity
- ☐ a gateway

Licensed to Berend Post berend.post@it-university.nl

Question 32

You have a SharePoint Server farm and a SharePoint Online subscription.

You plan to configure a SharePoint hybrid environment.

You need to identify which groups and roles must be assigned to your user account to implement the deployment. The solution must use the principle of least privilege.

Which three roles and groups should you identify? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- ☒ the Farm Administrators group in SharePoint
- ☐ the Service administrator role in Microsoft Office 365
- ☒ the Domain Admins group in Active Directory
- ☐ the ADSyncAdmins group in Active Directory
- ☒ the Global administrator role in Microsoft Office 365

Explanation:

References:

https://docs.microsoft.com/en-us/sharepoint/hybrid/accounts-needed-for-hybrid-configuration-and-testing

Question 33

You have a SharePoint Server farm.

You configure the farm to support custom tiles, and you add an item to the custom tiles list.

You open a web browser and discover that the new item does not appear in the app launcher.

You need to ensure that the tile appears immediately in the app launcher.

What should you do?

- ☒ From the developer tools of the web browser, run the ClearSuiteLinksCache() function.
- ☐ From the developer tools of the web browser, run applicationCache.swapCache.
- ☐ Call the Update() method of the website by using PowerShell.
- ☐ Increase the Title Order value associated to the custom title.

Licensed to Berend Post berend.post@it-university.nl

Question 34

You have a SharePoint Server farm.

You have a Microsoft Office 365 subscription.

You need to ensure that all user profile data is stored in Office 365.

What should you implement?

- ☐ hybrid Microsoft OneDrive for Business
- ☐ business-to-business (B2B) sites
- ☐ site following
- ☒ SharePoint Active Directory import

Question 35

You have a SharePoint hybrid environment.

When you run a search on-premises, you do not see any results from SharePoint Online on the results page.

You need to ensure that SharePoint Online results appear on the search results page along with the results from on-premises SharePoint Server.

Which two objects should you create? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- ☐ a search results page in on-premises SharePoint Server
- ☒ a result source in on-premises SharePoint Server
- ☒ a query rule in on-premises SharePoint Server
- ☐ a search results page in SharePoint Online
- ☐ a result source in SharePoint Online
- ☐ a query rule in SharePoint Online

Explanation:

References:

https://docs.microsoft.com/en-us/sharepoint/hybrid/display-hybrid-federated-search-results-in-sharepoint-server

Licensed to Berend Post berend.post@it-university.nl

Question 36

Your company has documents in both on-premises SharePoint Server and SharePoint Online.

Currently, users must search each environment for results.

You need to recommend a solution to ensure that searches performed from SharePoint Online contain results from on-premises SharePoint Server.

What should you include in the recommendation?

- ☐ search Best Bets
- ☐ federated search
- ☒ hybrid search
- ☐ multi-tenancy
- ☐ search Promoted results

Explanation:

References:

https://docs.microsoft.com/en-us/sharepoint/hybrid/display-hybrid-federated-search-results-in-sharepoint-online

Question 37

You have a SharePoint Server farm and a SharePoint Online subscription.

You plan to implement hybrid search.

You need to ensure that a SharePoint administrator named Admin1 can create a Search Service Application. The solution must use the principle of least privilege.

Which two Microsoft SQL Server roles should you assign to Admin1? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- ☐ serveradmin
- ☒ dbcreator
- ☒ securityadmin
- ☐ processadmin
- ☐ setupadmin

Licensed to Berend Post berend.post@it-university.nl

Question 38

You have a SharePoint Server farm.

You need to implement hybrid search.

Which two service applications are required for hybrid search? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- ☐ a Managed Metadata Service application
- ☐ Business Data Connectivity Service
- ☐ Work Management Service Application
- ☒ Cloud Search Service Application
- ☒ a User Profile service application

Question 39

You manage a SharePoint hybrid environment that contains an on-premises web application named webapp1.

You plan to configure self-service site creation in webapp1 to create sites in SharePoint Online instead of on-premises SharePoint Server.

From Central Administration, you open Configure self-service site creation, but you do not see the Create Site Collections in SharePoint Online option.

You need to ensure that you can enable the option.

What should you do first?

- ☒ Run the Hybrid Picker.
- ☐ Run the SharePoint Products Configuration Wizard.
- ☐ Install the latest cumulative update (CU) to the SharePoint server that hosts the Central Administration web application.
- ☐ Assign your user account the Global administrator role in Microsoft Office 365.

Explanation:

Reference:

https://docs.microsoft.com/en-us/sharepoint/hybrid/hybrid-self-service-site-creation

Topic 3, Migrate to SharePoint Online

(3 questions)

Question 40

You have a SharePoint Server farm and a SharePoint Online subscription.

You start a data migration by using the SharePoint Migration Tool.

After several hours, the migration fails. The migration log shows the following error message: "429 – Too many requests."

You need to complete the migration.

What should you do?

- ☐ Restart the front-end web servers, and then start a full migration job.
- ☒ Wait 24 hours, and then start an incremental migration job.
- ☐ Run the Set-SPTimerJob cmdlet, and then start a full migration job.
- ☐ Wait 24 hours, and then start a full migration job.

Licensed to Berend Post berend.post@it-university.nl

Question 41

You have a SharePoint Server farm and a SharePoint Online subscription.

The farm contains the lists shown in the following table.

List name	List template
List1	Report Library
List2	ExternalList
List3	Promoted Link list
List4	GanttTasks
List5	PictureLibrary

Which two lists can you migrate to SharePoint Online by using the SharePoint Migration Tool? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- ☐ List2
- ☐ List3
- ☒ List5
- ☒ List4
- ☐ List1

Explanation:

References:

https://docs.microsoft.com/en-us/sharepointmigration/sharepoint-migration-supported-list-templates

Question 42

You have a SharePoint Server farm and a Microsoft 365 subscription.

You plan to migrate some SharePoint sites to SharePoint Online.

You need to identify users who have access to your SharePoint Server on-premises environment and are NOT mapped to a Microsoft Azure Active Directory (Azure AD) account.

What should you use?

- ☐ The Test-SPContentDatabase cmdlet
- ☒ SharePoint Migration Assessment Tool (SMAT)
- ☐ SharePoint Migration Tool
- ☐ Azure AD Connect

Explanation:

References:
